[Arlington's Low Profile, Single-Gang Mounting Bracket](#)

The LV1LP Low Profile, Single-Gang Mounting Bracket is a new release from Arlington Industries and joins the family of non-metallic mounting brackets. This model is designed for 1/2" or 5/8" drywall installations. With furring strips, one could install this on cast concrete or concrete block walls. However you want to install this, the LV1LP offers excellent functionality combined with the model's signature low visibility design. Arlington's latest release offers a low-profile design to meet all of your Class 2 low-voltage wiring needs.

[The NEW Sonesse™ 30 RS-485 Ultra-Quiet Tubular Motor](#)

Designed for motorizing various products including; roller/solar shades, sheer horizontals, roman/woven shades, pleated/cellular shades, horizontal blinds and projection screens, the Sonesse™ 30 RS-485 features bidirectional serial communication with 3rd party control systems. Basic open, close, and stop commands allow for 16 intermediate positions or any percentage position between 0-100% with RS-485 or Z-Wave®. Feedback provides confirmation of each motor's position, ensuring precise control from 3rd party systems. This 24 V DC motor can be In-Wall Wired or Plug-In.

[Get the New Samsung F10M LED Projector from IAVI!](#)

The Samsung F10M data projector features the first LED light source outputting up to 1,000 ANSI lumens. The RGB LED light source has a wide emitting area for primary colors, delivering greater color range and intensity. It's rated at more than 30,000 hours, and eliminates the need for costly replacement lamps. And with networkability for control, monitoring and scheduling, along with the USB Document Viewer application, the F10M's flexibility is ideal for both mounted and table-top environments.

[New Unity Home System Software Release!](#)

The Unity Home System is changing the way that you and your customers think about home systems. And, with our newest software release - we're expanding the system functionality! Now available for download, this software release includes the ability to catalog and play mp4 (AAC unprotected iTunes music) and wma (Windows Media) files stored on the home network. It also adds Weather, allowing users to easily see up to the half hour or the full five-day forecast, and the ability to trigger a preset scene at any time using Events.
