About the Top 30 Listing

The Top 30 list is available online at www.cepro.com/top30wiring. The CE Pro list of Top 30 Structured Wiring Dealers is created using information from the dealers that participate. CE Pro does not verify the figures independently. Many high-volume installation companies choose not to participate in the listings. For these reasons, the Top 30 list should not be considered a complete or perfect compendium of the highest-volume dealers in North America. Instead, it is a reasonably accurate, fairly comprehensive catalog of some of the busiest structured-wiring dealers in the United States and Canada. Please direct questions and comments to jjacobson@ehpub.com.
