

Imagine moving into a new home that plays your movies in extraordinary surround sound, and can also instantly stream all the music you want.

Making it happen is easier than you think. Lifestyle 600 in-wall systems are custom-made to seamlessly blend with your room, and they're integrated with SoundTouch — the technology that gives you access to a world of music, and lets you stream it room to room.

## Made for the way you live. And the way you listen.

With a Lifestyle home entertainment system installed, your main room can become a center for all the music, movies, and

TV you want — but it doesn't have to stop there. Once you have one SoundTouch system, it's easy to add more any time. They all work together, so as you go from room to room, your music goes with you. And you can control it all with the SoundTouch app.

Expand to other rooms like the kitchen, den or patio. We can install built-in or outdoor speakers along with the SoundTouch SA-5 amplifier, so your favorite music plays anywhere at home. Even the backyard.

SoundTouch gives you instant access to popular music services like Spotify<sup>®</sup> and Pandora<sup>®</sup>, Internet radio stations, and stored music libraries through your home Wi-Fi<sup>®</sup> network. Or just play music directly from your phone or tablet using a Bluetooth<sup>®</sup> connection.

## Your sound. Your home.

These are just a few examples. As your Bose authorized representative, we'll design your system, install everything, then show you how to use it. Find out more about the systems, warranties and services you receive when using a fully authorized Bose dealer. Contact us today.
